DETAILED ACTION

Claims 1-36 are pending in this application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to a pharmaceutical composition, classified in class 424, subclass 745.
- II. Claims 21-35, drawn to a method of treating infection, classified in class 514, subclass 885.
- III. Claim 36, drawn to a composition, classified in class 424, subclass 725.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case treating infection can be done with antibiotics or an antibacterial or compositions such as penicillin, Cephalexin or Nitrofurantoin.

Inventions I & II are unrelated to invention III. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Inventions I and II are related, as discussed above; however, Invention III does not require the antimicrobial compound and

pharmaceutically acceptable carrier as required by Inventions I and II and none of the claims of Inventions I or II require VBG.

Therefore, Inventions I & II are not related to Invention III because they are not disclosed as capable of use together and they have different modes of operation, different functions, or would have different effects.
